Public Sector Leadership for environmentally aware and sustainable public procurement of datacenters

Jaak Vlasveld
Green IT Amsterdam Region
Director
jvlasveld@greenitamsterdam.nl

OUR MISSION

Increasing energy efficiency and decreasing carbon emissions by scouting, testing and exploring smart IT solutions

Because IT plays an increasingly important role in our efficient and smart society.

THIS IS WHAT WE DO

- Scouting innovative technology
- Creating piloting and business opportunities
- Sharing through our network and showcasing good practices
- Creating opportunities to demonstrate commitment to our participants' sustainability goals

Greenit

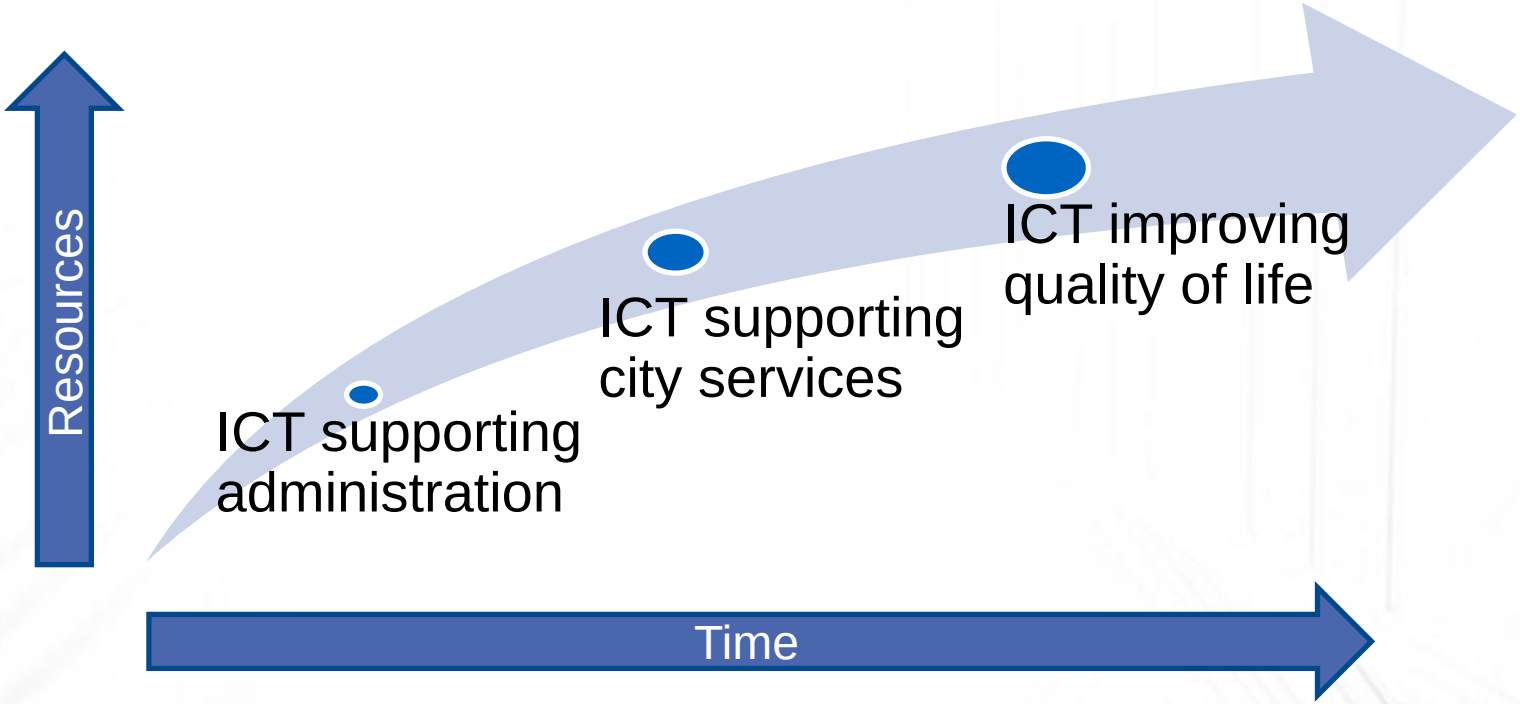
45+ consortium participants
Supported by our Alliance Partners

Smart Cities have more IT



Walk the talk

Green scales well

Invest and earn back

Resources ARE finite

Narrowing down the search space

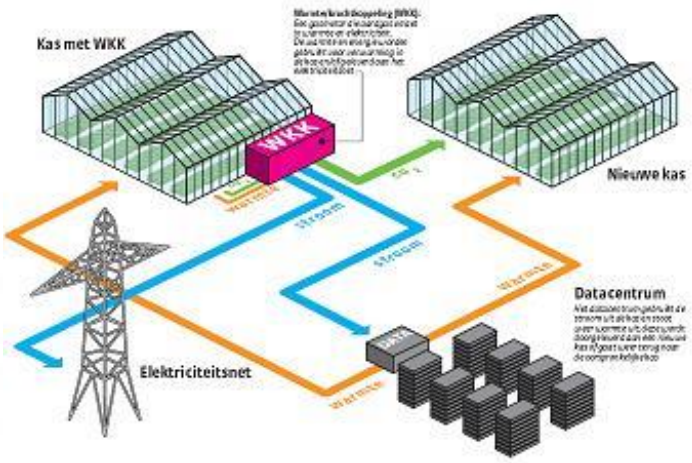
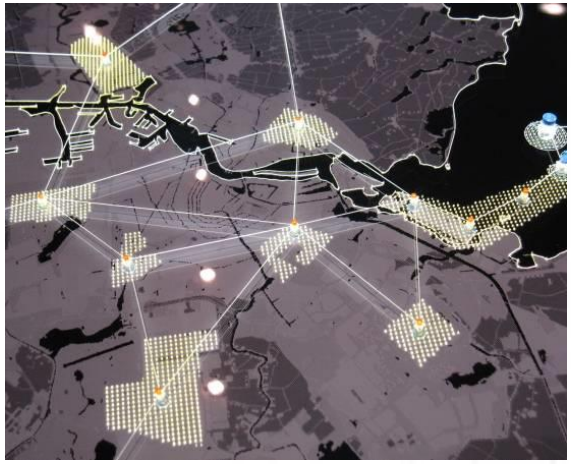
Next step: smart grid integration?





Datacenters can and should provide **energy flexbility** services to support the energy grid during the **energy transition**
