

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 649972.

Project partners:

maki Consulting GmbH
Life cycle expert services

About Us

The event is organised under the EURECA project, which is an EU Commission H2020 funded initiative. EURECA is designed to provide support for EU public sector organisations to engage in innovation procurement for environmentally sound data centre products and services.

Registration

Please register through the Data Centre Summit registration page: <https://tinyurl.com/zv2doey>

Date

Thursday 8th February 2018

Venue

Business Design Centre
52 Upper Street
London
N1 0QH

Continuous Professional Development

Those who attend any four sessions will receive an official EURECA training certificate. Please register and login to the EURECA website (www.dceureca.eu) and then scan the QR code below to request your certificate.

The EURECA project is an EU commission funded project under the H2020 programme. EURECA started in March 2015 and will run for 36 months with partners from the United Kingdom, Ireland, Netherlands and Germany. EURECA is designed to provide tailored solutions to help identify the cost saving opportunities whilst signposting the environmental impact of procurement choices in data centres.

EURECA is currently supporting consolidation, new build and retrofit data centre projects in various European countries, with focus on public procurement for innovation (PPI). Additionally, EURECA is supporting the development of European standards, best practices and policies related to energy efficiency in data centres and green public procurement by providing the scientific evidence and data.

This event brings together key public and private sector European experts and thought leaders to discuss innovation in public sector digital infrastructure and energy efficiency. Innovation procurement, data centre energy efficiency, and environmental sustainability are among the topics to be discussed. The event is suitable for C level ICT executives, IT managers, policy makers, energy managers, data centre managers, procurement professionals and researchers.

The 14th EURECA Workshop will be co-located with [Data Centre Summit 2018 London](#).

AGENDA - Thursday 8th

14:30 Arrival and early networking opportunities

14:45 **EURECA: Lessons Learned from Evaluating over 350 Public Sector Data Centres**
