The 14th EURECA
Workshop in
London

Friday 9th February 2018 at
House of Commons

The EURECA project is an EU commission funded project under the H2020 programme. EURECA started in March 2015 and will run for 36 months with partners from the United Kingdom, Ireland, Netherlands and Germany. EURECA is designed to provide tailored solutions to help identify the cost saving opportunities whilst signposting the environmental impact of procurement choices in data centres.

EURECA is currently supporting consolidation, new build and retrofit data centre projects in various European countries, with focus on public procurement for innovation (PPI). Additionally, EURECA is supporting the development of European standards, best practices and policies related to energy efficiency in data centres and green public procurement by providing the scientific evidence and data.

This event brings together key public and private sector European experts and thought leaders to discuss innovation in public sector digital infrastructure and energy efficiency. Innovation procurement, data centre energy efficiency, and environmental sustainability are among the topics to be discussed. The event is suitable for C level ICT executives, IT managers, policy makers, energy managers, data centre managers, procurement professionals and researchers.

AGENDA – Friday 9th

09:00 Registration, breakfast and early networking opportunities

09:30 **Energy Efficiency in Public Sector ICT Infrastructure: Lessons Learned from the EURECA Project**

Rabih Bashroush
EURECA Project
Coordinator, University
of East London, UK
